WORK EXPERIENCES

- **Mid Level Front End Web Developer**
 - **MagisSolutions Inc. - (May 2016 - Present)**
 - Upgraded the company software, Magis CMS (Content Management System), to have faster UI by adding Laravel SSR, SPA, PWA, and SCSS features. Also updated Admin UI including old vue components for faster and easier content management.
 - Excellent speed at work which increased Projects and Deliverables.
 - Introduced React Native for Mobile Development. Developed and Deployed a mobile app on Appstore and Playstore.
 - Uses Agile Development using Git by branching features and fixes on Gitlab repositories for coding and testing, creating a clean and systematic code for the team.
 - Creates functional websites with minimum supervision.
 - Converts mockups and prototypes into websites.
 - Creates Responsive Websites. Can develop a website using mobile first or desktop first approach.
 - Research and Development on technologies given by my superior to be implemented on projects.
 - Experience on Backend Development using Laravel PHP.
 - Manages Website's from deployment to maintenance on Forge Laravel Server which includes database creation and backups.
 - Created designs for Magis CMS and Official Company Websites.
 - Teaches colleagues and helps them to resolve issues and answer questions regarding Front-end Development.
